## The Others Just Travel.

A luxury sports car that has been an icon since day one in 1947. Racing power and ultimate comfort, fit for the future. More than a car, it is a lifestyle.

The all-new GranTurismo is available in three different trims, which boldly underline their elegant, sporty and innovative souls.

The GranTurismo **Folgore** is the first full-electric Maserati ever. The Folgore's powertrain is developed with Formula E- derived technology like the silicon carbide inverters for a better energy flow and higher efficiency. The cutting-edge 800-volt battery powers three potent 300-kw permanent magnet motors – one in the front, two in the rear – to deliver up to 560 kW 761 hp and a mind-blowing 1,350 Nm of torque across all four wheels.

The mighty race-derived V6 Nettuno Twin Turbo engine is the beating heart of **Trofeo's** outstanding performance. Up to 550 hp and 650 Nm of torque at 6.500 rpm: it is the most powerful internal combustion engine ever fit in a GranTurismo.

For some, “long distance” means more time for pleasure. The embroidered graphic motif of the interiors of the GranTurismo **Modena** is a homage to Michelangelo's Campidoglio Plaza in Rome: it sweeps across the cabin in a harmonious interplay between textile and tech.

Where the others just travel, the Maserati GranTurismo is for grand touring.
